

Summer Preparation Work

Welcome to the Faculty Creative Digital. Creative digital is a new Faculty that specialises in the development of digital products ranging from Film and Media, Games Design, Technical support and Computer Science. We look forward to seeing you in September over the summer we would like to give you a taste of what you can expect in the coming academic year. The summer work we have prepared for you will test your knowledge of digital practices and test your skills in evaluation and analysis. We have prepared the activities to be assessed in the same manner expected in September.

Please be aware that prep work is an important aspect of your induction onto all courses at Wilberforce Sixth Form College. Please have this ready to hand in during enrolment or to your course teacher in the first week of lessons.

Kind regards

David Hastings

Faculty Head for Creative Digital

Task 1 - Research

Your research task will be to research different apps that are available for mobile phones and websites. You will also research different types of programming languages to help you to select and discuss one that you think is most appropriate for the development of an app.

Task 2 - Create

Your task is to develop a fun game for Urban Mobile that will act as an introduction to the Urban Mobile app download marketplace service and will be pre-loaded onto phone handsets that they sell. Games can also be played on the Urban Mobile website.

Task 3 - Question

Follow the link in the summer section of Moodle to access our Google Docs "Digital Test". This will give us an indication of your current digital level.
